

## About Us

Finding the perfect adult rehabilitation or long-term care facility doesn't need to be complicated. Choose Arlington. With modern comforts, the latest technology and a caring staff, you'll be in great hands.

Our team of skilled nurses, therapists, and licensed care professionals treat every resident with compassion, respect and kindness. We work together to care for you with personalized treatment plans. We'll help you be as independent as possible, manage chronic conditions and improve your overall well-being.

You'll be impressed by the cheerful, warm atmosphere at our senior living facility.

Don't take our word for it. Request a consultation or schedule a tour.

Respiratory Therapy

### • Long-Term Care

### • Hospice Care

### • Respite Care

### Rehab Services

#### Occupational Therapy

The occupational therapists at our skilled nursing facility will work with you to increase your level of independence. We will help seniors improve their ability and confidence while performing activities of daily living (ADLs) including bathing, eating, dressing, self-care and home management tasks.

As we get older, our risk of fall or injury increases. Our occupational therapists will guide nursing home residents through safety awareness and fall prevention education

#### Physical Therapy

Physical therapy uses exercises, stretches and education to help you regain your ability to do daily activities. The physical therapists at our skilled nursing facility will work with you to build your strength, balance and mobility.

The advanced physical therapy program at Arlington Rehabilitation & Nursing Center begins with an initial assessment. Once we understand your unique needs based on this assessment, we'll create a personalized physical therapy plan for you. We'll guide you through individualized exercises and education so you can meet your rehabilitation goals and return home as quickly and safely as possible.

### Rehab To Home

Arlington Rehabilitation & Nursing Center prides itself on rehabilitating residents so you're able to quickly return to a more independent setting, including returning to home. The therapists at our skilled nursing facility work hard to help you achieve the best possible success.

### Speech Therapy

Strokes and other health conditions that affect your brain can make it difficult for you to communicate. They can also make it hard for you to have control over your mouth and throat, which affects your ability to eat and swallow.

The speech therapists at Arlington Rehabilitation & Nursing are here to help you improve your fluency, clarity, comprehension and ability to swallow. They also monitor and modify swallowing techniques and introduce diet modifications and special feeding techniques when necessary if you have decreased abilities in these areas.

### Respiratory Therapy

Our respiratory therapy department has the equipment and staff available for any potential admission. We're dedicated to helping residents manage a diagnosis of COPD, emphysema, pneumonia or any other breathing difficulties. You or your loved one will be in the skilled hands of trained respiratory therapy staff who are solely focused on your respiratory health.
